

# POST BASIC INFECTION CONTROL

## OVERVIEW :

The Post Basic Infection Control professional development course, from DSH Institute of Technology, is one of the most reputed qualification in Malaysia. DSH Institute of Technology is one of the very few institutes in Malaysia which conducts this course and the program is endorsed by the Ministry of Human Resources and is claimable via the Human Resource Development Funds (HRDF).

The Post Basic Infection Control is a six month program designed to prepare an already registered nurse for specialization in the field of infection prevention and control. The program consists of a combination of classroom and laboratory activities as well as clinical placements in government and private healthcare settings.

At the end of our 'Post Basic Infection Control' course, at DSH Institute of Technology, students will be able to :

Gain comprehensive knowledge on disease transmission processes, common infectious diseases and current evidence based infection control and practices

Be equipped with hands – on experiences, through clinical placements in private of public healthcare settings, in managing and preventing outbreaks.
